📞 +91 9600617163

ABOUT ME

Aspiring Data Analyst with a strong foundation in Python, SQL, data visualization, and analytical problem-solving. Passionate about transforming raw data into meaningful insights to support business decision-making. Experienced in AI and data analytics projects, with a commitment to continuous learning and professional growth.

EDUCATION

IFET College of Engineering | 2023 - 2027
Bachelor of Technology - Artificial Intelligence and Data Science | CGPA: 8.9

St. Joseph Of Cluny Matriculation Higher Secondary School | 2022 - 2023
HSC - Computer Science | Percentage: 81%

St. Joseph Of Cluny Matriculation Higher Secondary School | 2020 - 2021
SSLC | Percentage: Pass

INTERNSHIP

Languify (Powered by Coincent), Online | Aug 2024 - Sep 2024
Artificial Intelligence with Python Intern : Worked with Python to analyze datasets and implement machine learning techniques. Gained hands-on experience in data preprocessing, model development, and data-driven problem solving.

NextGen Technologies Pvt. Ltd. | Feb 2025 (15 Days)
Data Analytics Intern : Performed end-to-end data analysis and developed predictive ML models.

- Performed end-to-end data analysis and developed predictive ML models using Python (Pandas, scikit-learn).
- Created interactive dashboards in Tableau to communicate data-driven insights to stakeholders.

SKILLS

- Python
- SQL
- HTML
- CSS
- C
- Java
- Database Management
- AI / ML
- NLP
- Web Development
- Full Stack Development
- Data Visualization
- Excel
- Analytical Problem Solving
- Communication

PROJECTS

TeamUp AI — AI-Powered Group Project Manager (Personal Project)

- Built a full-stack web app using Python (Flask) and SQLite that uses Google Gemini AI to auto-assign project tasks to team members.
- Each member receives a unique private link to view and update only their task; Team Lead gets a live dashboard to track overall progress.
- Designed a multi-page SaaS-style UI with dark glassmorphism theme.
- Tech Stack: Python, Flask, SQLite, Google Gemini API, HTML, CSS, JavaScript.

FixBox — Full-Stack Warranty and Repair Management Platform “COMPLETED”

- Developed a full-stack warranty and repair management platform with role-independent user authentication, product ownership tracking, bill image/PDF upload, warranty health analytics, repair history management, and SQLite database integration.

TwinSync — Digital Twin Based Fault Prediction System for Industrial Tank Monitoring “ONGOING”

- Developing an Industrial IoT-based predictive maintenance system using a physics-based digital twin to monitor tank level, temperature, pump, valve, heater, and sensor behavior.
- Features real-time fault detection, confidence scoring, incident reporting, replay mode, and interactive dashboard visualization.

EduNavigator — AI-Powered Career & Exam Preparation Engine (Final Year Project)

- Developed a full-stack career platform using Python (Flask) and SQLite managing a 10,000+ question bank across 14+ competitive exam sectors.
- Engineered a Syllabus Overlap Engine to analyze cross-exam compatibility, featuring timed mock test simulators and an in-page AI Tutor.
- Tech Stack: Python, Flask, SQLite, HTML, CSS, JavaScript, REST APIs.

CERTIFICATIONS

- IBM SkillsBuild – Getting Started with Artificial Intelligence
- Infosys Springboard – Prompt Engineering
- Infosys Springboard – Artificial Intelligence for All
- Infosys Springboard – Generative AI for All
- NPTEL Certification
- CCNA Certification

WORKSHOPS, HACKATHONS & PROJECT EXPO

- Visual Insights: Data Storytelling with Python & Tableau – ISTE Student Chapter, IFET College of Engineering
- Web Development Workshop – Top Engineers India, IIT Madras Research Park
- IFET Hack Warriors'26 – 24-Hour National Level Hackathon
- HackIndia 2026 – National Web3 & AI Hackathon
- Sustainable Innovations Project Expo 2025 – IFET College of Engineering
